Qyedo

(V. Levin)

Fullstack Developer — Crypto / Web3

Telegram: @qyedo
Remote · UTC-2 — UTC+2
Building software since 2020

Summary

Fullstack developer with experience building crypto / Web3 products, web applications, and internal SaaS systems.

I can join a project at any stage — from a quick website and interface launch to building a full product with backend, payments, realtime features, and integrations.

React · TypeScript · Go · Python / FastAPI · MongoDB · PostgreSQL · TON

Experience

Fullstack Developer - GC Group

2025 - present

Crypto / Web3 and internal web products.

- NFINE - a GameFi ecosystem: built the token website and the app for Telegram, Web, and Android. The product combines a game economy, social features, farming, quests, in-app trading, and crypto payments in TON, USDT, and the project's own token.
- MetaForge - an internal SaaS platform: a system for managing projects, tasks, employees, permissions, clients, documents, and internal company processes.
- For MetaForge, built a built-in AI development environment: the user states a task in plain text, the system clarifies requirements, writes and checks the code, runs the result, and shows a live preview. Works with both new projects and existing codebases.
- Built a shared crypto-payment layer used across several products: creating payment sessions, tracking transactions, and preparing payments for user wallets.
- Built realtime WebSocket mechanics for game and interactive products, where multiple users' state has to stay in sync without reloading the page.

Frontend Developer Intern - Smart Techno Lab

2023 - 4 months

Commercial frontend development as part of a team.

Freelance Developer

2020 - 2023

Websites and landing pages for private clients using HTML, CSS, and JavaScript.

Skills

Frontend	React, TypeScript, JavaScript, MobX, Redux, Zustand, SCSS
Backend	Go, Python, FastAPI, REST API, WebSocket
Databases	MongoDB, PostgreSQL, SQLite
Crypto / Web3	TON SDK, wallet integrations, crypto payments
Tools & Platforms	Docker, Git, Telegram Mini Apps, Android WebView, n8n
Languages	Russian - native, English - C1

Portfolio

Public websites, apps, and detailed case studies are available on the site. Private commercial projects I can walk through personally.
